Design. Deliver. Support.

# Mission-Critical Communications

**At Westelcom, our vision is to be great at designing, delivering, and supporting mission critical communications solutions for our customers.** Our information and communications technology provides services to support a wide range of vertical solution offerings, supporting dedicated and hybrid architectures including value-based network innovation, deployment, and network operations excellence.

Carrier | Healthcare | Education | Government | Financial | Non-Profit

## Voice Services

Our high-quality voice services provide a wide array of features to hospitals, governments, manufacturing firms, media, and thousands of small businesses.

## SD-WAN

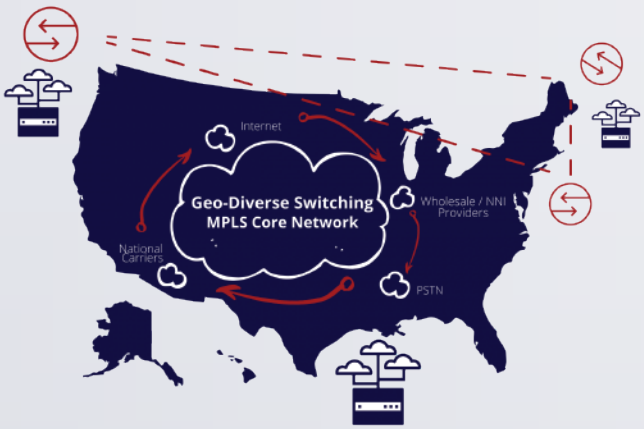

Our SD-WAN solutions provide the enhanced levels of resiliency, efficiency, reporting, security and application visibility mission-critical businesses require.

## Data Connectivity

Our carrier-grade network provides high-speed internet service via a local and regional fiber backbone with diverse connectivity and redundant switching and routing platforms.

## UC Solutions

Unified Communications enable organizations from small businesses to enterprise, to reliably communicate with greater ease and better operational efficiency.

## Our Network Keeps Growing

For the past 15 years we have focused on designing and constructing the most highly redundant and scalable fiber network throughout Northern New York. In 2020 we began crafting our nationwide network and continue to develop an infrastructure that will allow us to design, deliver and support mission-critical communications.
