Design. Deliver. Support.

Local Business Product Guide

Design. Deliver. Support.

Westelcom

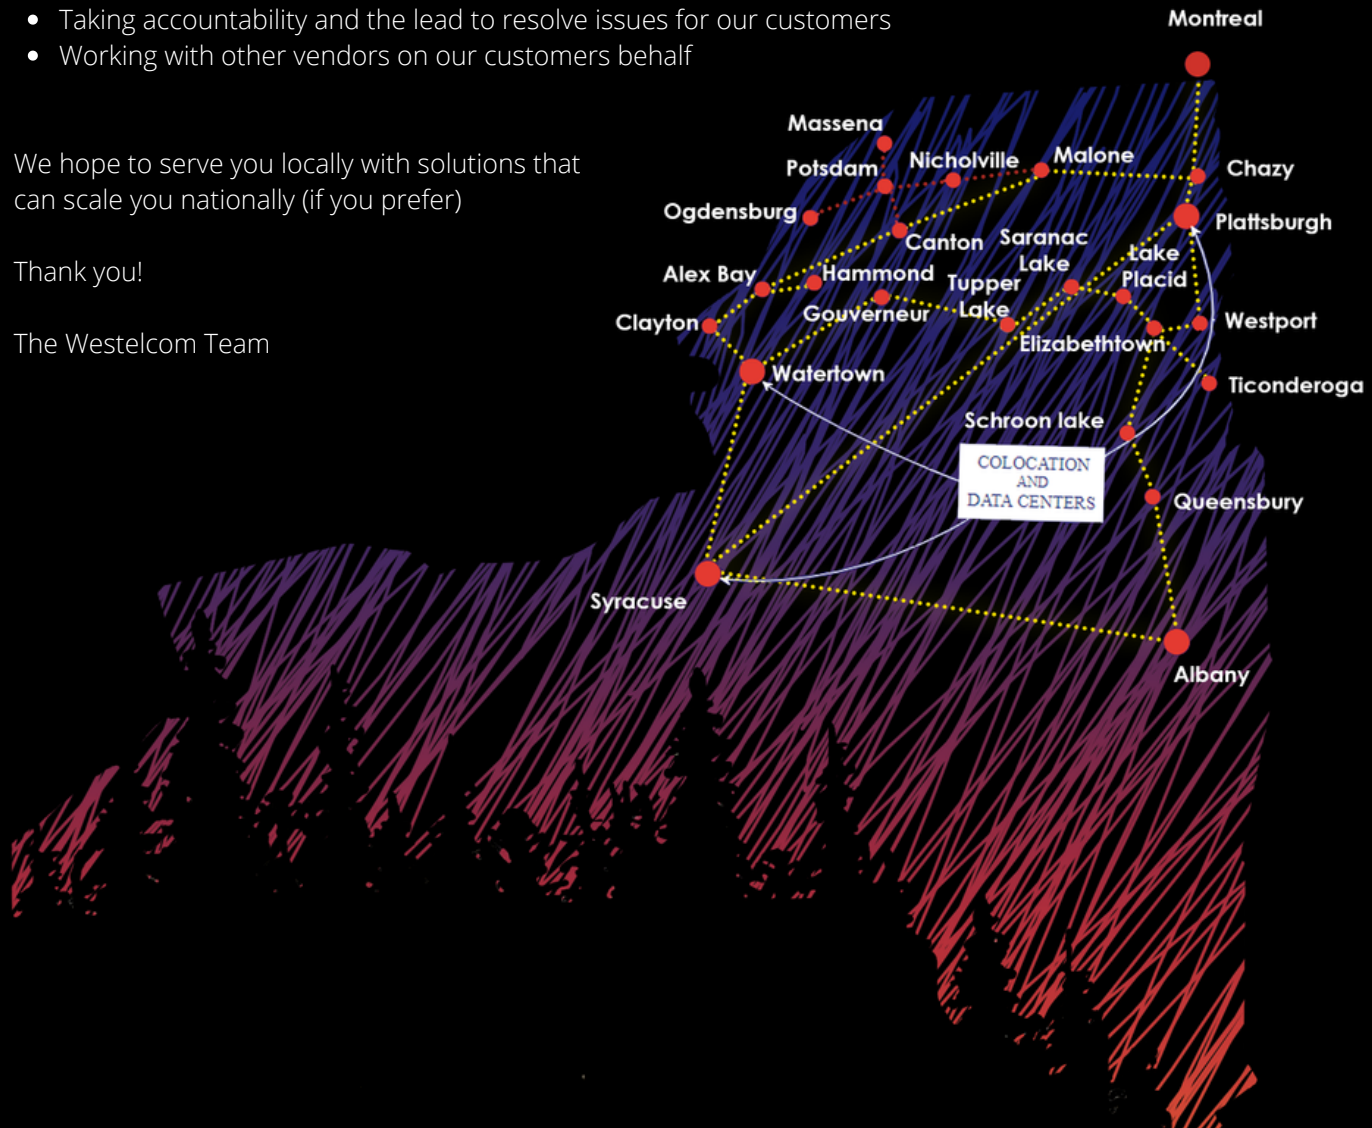

At Westelcom, we believe in doing what other telecommunications companies are unwilling to do and our vision is to be great at designing, delivering, and supporting mission critical communications solutions to our regional customers by:

- Constructing our network with multiple levels of redundancy and protection
- Taking the lead with solving communications challenges for our customers
- Providing solutions rather than selling products and services
- Seeking to understand our customers and their needs
- Working with our partners to provide the best possible solution to our customers
- Providing our customers with realistic installation schedules and timelines
- Communicating frequently and openly with our customers
- Performing thorough site surveys
- Pre-programming/configuring our customer's equipment prior to installation
- Practicing and following customer centric installation processes
- Clearly communicating any potential installation delays with our customers
- Pro-actively monitoring our customers networks
- Being responsive to our customer's troubles and taking ownership of the trouble
- Providing clear communication procedures and tools to our customers
- Monitoring our customers connections and pro-actively addressing any troubles
- Providing customers direct insight into their network connectivity
- Continually communicating with customers until their issues are resolved
- Taking accountability and the lead to resolve issues for our customers
- Working with other vendors on our customers behalf

We hope to serve you locally with solutions that can scale you nationally (if you prefer)

Thank you!

The Westelcom Team

Westelcom®

Data Connectivity

Westelcom's business-class internet solutions are built on a carrier-grade fiber network with diverse connectivity and redundancy. This network is integrated with statewide fiber networks through peering partnerships providing dedicated bandwidth, reducing latency and providing an improved overall user experience. Should an issue arise, our 24x7x365 Network Operations Center monitoring provides quick response—usually before you even know it.

Dedicated Internet Access

Our Dedicated Internet Access services provide personalized, guaranteed bandwidth using an integrated fiber network interconnected with multiple telecommunications carriers.

Ethernet

Our highly scalable business-class ethernet service is a offers simple, secure, cost-effective connectivity using a custom, dedicated private fiber with variable transport speeds.

Fiber

Our carrier-grade network provides high-speed internet services via a local and regional fiber backbone with diverse connectivity and redundant switching and routing platforms.

Westelcom's mission-critical network provides data connectivity at four service levels:

STANDARD
Unbeatable value with speeds up to
100 x 100

PREMIUM
Fast and reliable with speeds up to
300 x 300

EXTREME
Blazing fast data at speeds up to
500 x 500

MAXED-OUT
Our top of the line with speeds up to
1GB x 1GB

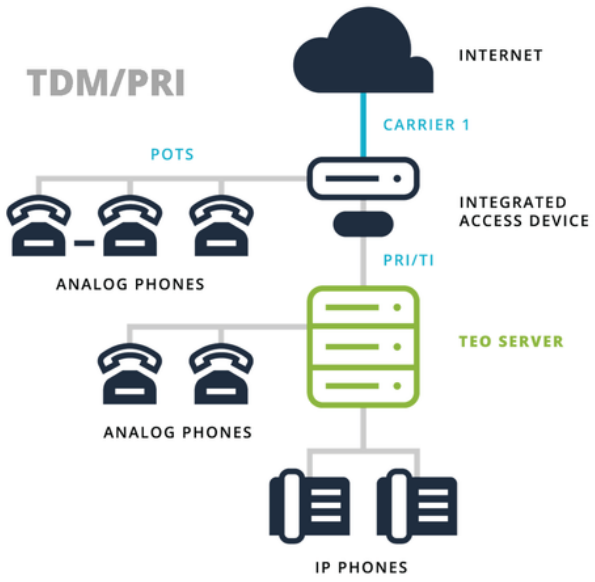

Westelcom®

Voice Solutions

We provide a wide array of voice features and services. The quality of these service offerings matches that of top telecommunication providers to hospitals, governments, manufacturing firms, media, and a multitude of SMB's requiring the highest levels of performance and reliability from their phone service.

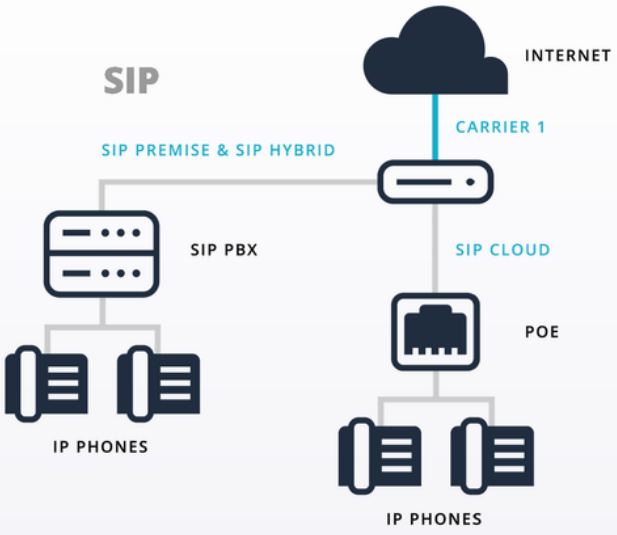

Leverage Legacy Technology With A Modern Delivery

- Provides for an easy transition to SIP trunking with the same underlying technology
- Up to 23 concurrent calls
- Advanced digital messaging between your PBX and our carrier switch

Begin The Journey To Enterprise Voice Network Modernization

- Flexible and dynamic service
- Scalable number of concurrent calls
- Cost effective
- Replaces traditional telephone lines

Westelcom®

Teams Business Voice

Your employees can now use Teams Business Voice to make and receive calls to people outside your organization on desktop, laptop, smartphone, or tablet devices. Microsoft Teams is a digital hub for workplace chat, video meetings, calls, file storage, and application integration. The service integrates with Office 365 and has extensions that can integrate with non-Microsoft products.

One phone number across all Teams-enabled devices.

This means no need for multiple phone numbers or juggling calls between a desk phone, computer, and mobile device.

Seamless interactions across platforms.

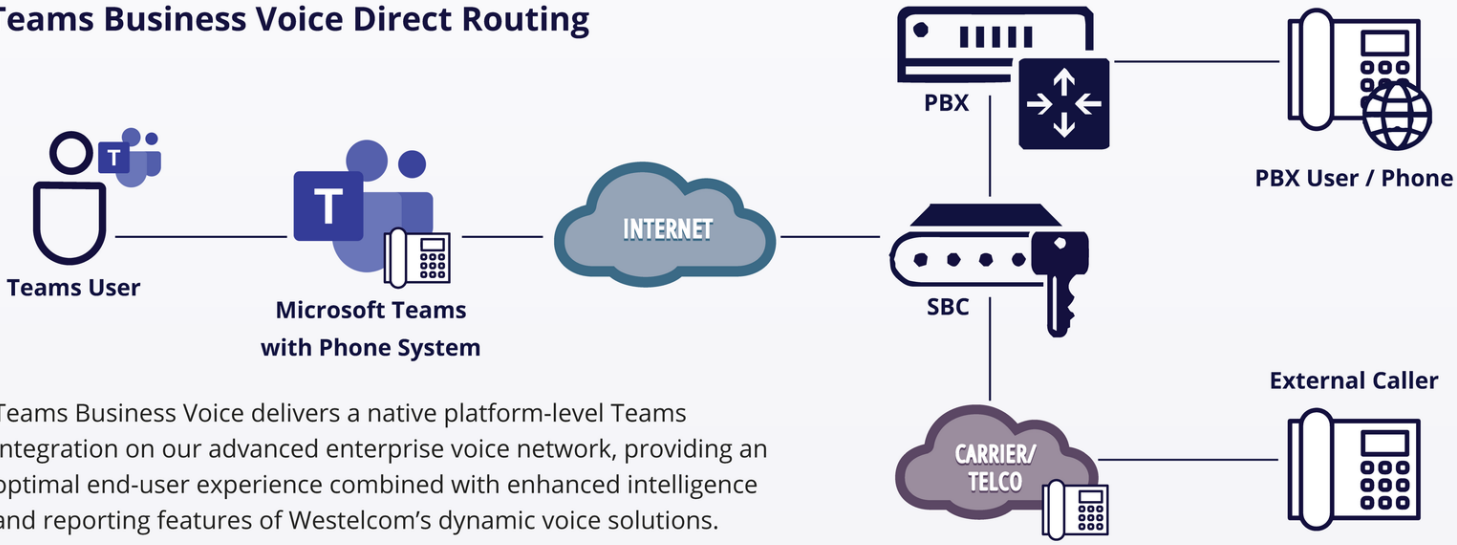

With the ability to call anyone, employees need not pause their work to move away from Teams to call external colleagues or customers.

Desk phones are optional.

Since calls are made through computers, businesses can achieve cost savings by scaling back their investment in phones for every desk.

- Unparalleled voice quality experience
- Affordable calling packages
- 24x7 Carrier Network Monitoring & Support
- Enterprise-grade security and compliance
- Seamless provisioning and onboarding for Microsoft Teams
- Documented SLA
- Integrate advanced calling features
- Integration with existing PBX Solutions
- Mix it up!
- Keep Your local numbers
- Improve call quality by leveraging Westelcom's state of the art carrier network
- Keep Your Business Numbers

Teams Business Voice Direct Routing

Teams Business Voice delivers a native platform-level Teams integration on our advanced enterprise voice network, providing an optimal end-user experience combined with enhanced intelligence and reporting features of Westelcom's dynamic voice solutions.

Westelcom®

Teo UC Solutions

Teo, a Westelcom solution, offers Unified Communications (UC) capabilities that enable organizations from small businesses to enterprises to communicate with greater ease and better operational efficiency.

Teo stands apart from its competitors in several important ways:

DESIGN PHILOSOPHY

Teo solutions are designed to be extremely powerful yet highly intuitive. Many technology companies claim to do the same, however, they typically fall short. We invite you to view a demo so we can show you just how far ahead of the competition we are. In fact, we may not only be the best user experience (UX) in Unified Communications, we are most likely the best UX in enterprise software, period. It is a bold claim to be sure, but delivering on bold claims is what we do.

REVOLUTIONARY ARCHITECTURE

Teo System Architecture is the most resilient ever created. Each Teo UC node provides the full UC suite of capabilities. There is no need for external interfaces or gateways, mobility servers, voicemail servers, etc. Each Teo UC node can support 1 - 2,500 users. Multiple nodes can be clustered to create larger and more resilient systems allowing for rapid scaling while also adding multiple layers of redundancy. Each node in the cluster is in constant sync with all other nodes and devices so they can immediately handle system activity in case any other node suffers a network or power interruption.

COMPREHENSIVE SOLUTIONS

Teo designs, builds, and supports all of the components of our solution so you can have total peace of mind. This enables us to deliver the finest technology ownership experience in the industry. Systems can be configured in minutes, and changes across an enterprise can be handled in seconds.

PEACE-OF-MIND OWNERSHIP

All system software and hardware is covered by Teo comprehensive support, software assurance, and hardware warranty. If something goes wrong, we will take care of it. We have U.S. based support resources at the ready to give you a hand.

INTEGRATION READY

Teo solutions offer tailor made integrations for web browsers, email clients, Outlook, Microsoft Dynamics CRM, Salesforce CRM, Lyne, Skype for Business, and we have an API to integrate with any custom infrastructure you want to integrate with.

Westelcom®

UC Deployment Options

Westelcom solutions have the same applications and capabilities regardless of deployment type. Each deployment offers distinct advantages based on an organization's technical environment and business preferences. There is no right or wrong answer here, it is simply about picking the solution right for your organization at this time. To reduce stress, we even offer the capability of changing deployment type down the road without service interruption or user disruption.

Cloud

Cloud deployments leverage multiple geographically dispersed data centers and PSTN interconnection points to provide highly resilient cloud unified communications.

ADVANTAGES

- Low start up costs
- Predictable monthly charges for technology and telco services
- Limited IT resources required

Premises

Premises deployments are ideal for customers that are locked into long term PSTN contracts, or who have sophisticated IT networks in place with available internal or contracted resources able to manage the solution. Westelcom premises systems can connect to PRI, analog, or SIP trunks and multiple nodes can be clustered together for the most advanced resiliency available today. Westelcom offers attractive lease options for Premises deployments.

ADVANTAGES

- Bring Your Own Circuit Flexibility
- Capital vs. Operation Expense Model
- Attractive Leasing Options

Cloud Plus

Cloud Plus deployments offer the advantages of both Cloud and Premises models for the ultimate in resiliency, while requiring very little internal IT resources. Cloud Plus deployments are comprised of one or more onsite UC Premises nodes in real time sync with Cloud services. This solution provides advanced resiliency if any site or sites experience last mile network interruptions.

ADVANTAGES

- Bring Your Own Circuit Flexibility
- Capital vs. Operation Expense Model
- Attractive Leasing Options

Teo UC Solutions

Teo, a Westelcom solution, is our Unified Communications solution that enables organizations from small businesses to enterprises to communicate with greater ease and better operational efficiency.

Popular Applications

SCREEN SHARING

Share your screen from the Teo Softphone with up to 100 participants. Screensharing requires no plugins or applications to install for viewers. They simply open the link you share with them in any HTML5 compatible browser. You can share your screen with mobile and tablet users as well, seamlessly.

INSTANT MESSAGING

Organizations need to have IM, but they also need to have it secure and, even better, integrated with their entire communications suite. Teo Instant Messaging is accessible from all PC/Mac softphones, smartphone and tablet applications, and the Teo 9160 IP desk phone.

VIDEO EVERYWHERE YOU GO

The Teo UC platform offers multiple HD codecs and is smart enough to measure real time network availability between endpoints to select the best one to use for every connection. Video calls can be made and received from all PC/Mac softphones, smartphone and tablet applications, and the Teo 9160 IP desk phone.

PRESENCE

Presence awareness is a cornerstone of Unified Communications, and Teo does presence better than anyone else. Presence states are automatically synced across all user devices and presence states can drive customized communications call flows for maximum efficiency and convenience.

Teo
A Westelcom Solution

UC Faxing

Teo UC Faxing seamlessly integrates fax capabilities into your organization's Unified Communications deployment, allowing you to send and access faxes through your UC platform anywhere, anytime.

Fax Activity Log

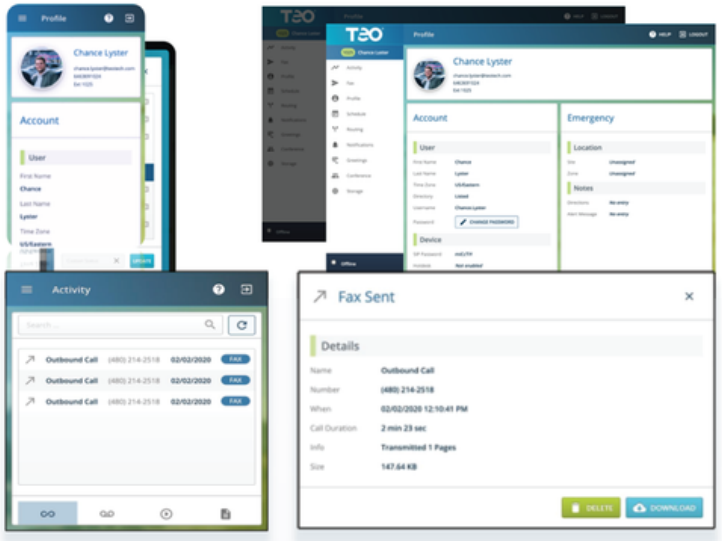

- Provides a centralized, searchable, location to view both inbound and outbound fax results
- Details, including pages transmitted or received are available for all calls
- Faxes are available to download as a PDF directly through the web interface
- All access requires authentication and file paths are encrypted for security

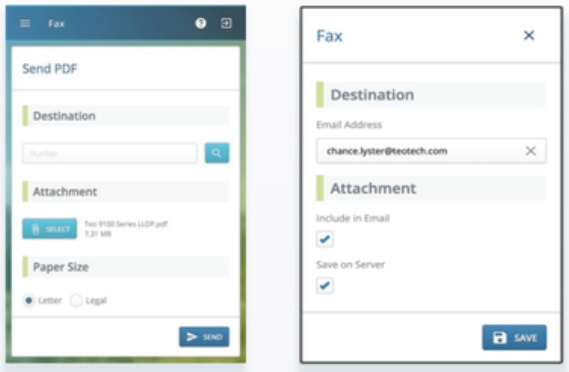

Sending Faxes

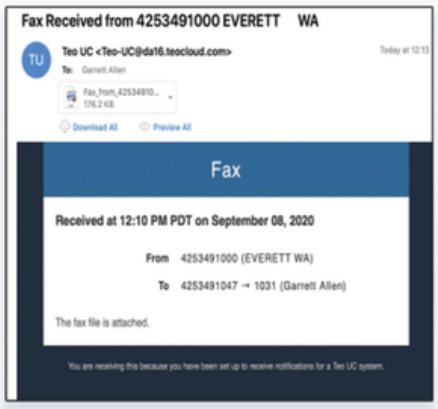

- Inbound faxing is included for all users, only requiring a DID assignment
- Outbound faxing is included for all users as allowed by administrators
- Contact management for frequent destinations
- Upload a PDF file from local system, including from mobile devices

Flexible Notifications

- Faxing can be setup to notify individuals as well as lists or groups via email
- Notification Email can include a PDF file of the fax or alert the recipient to retrieve via the Fax Activity Log
- Optionally user configured or admin controlled

Westelcom®

Collaboration

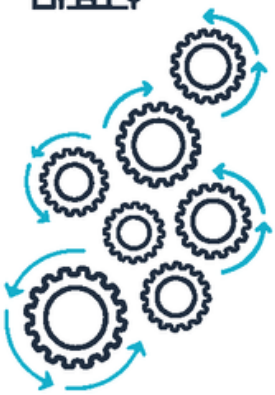

Westelcom enables productive, intelligent, secure collaboration for your team—anywhere, anytime, on any device—with Office 365 and high-quality cloud-based solutions for file storage, document sharing and co-authoring, chat and video conferencing, and integration with your favorite third-party apps.

With Microsoft Teams, we help your team stay connected, collaborate seamlessly, and simplify work in a secure and compliant way—all in one place.

Meet and collaborate seamlessly as a team from anywhere.

Microsoft Teams delivers online meeting essentials plus AI-enabled features to help optimize meetings, reduce fatigue, and include everyone. Native features that work together seamlessly support remote end-to-end collaboration, so users can chat, call, share files, search, manage tasks, and co-author as a team before, during, and after meetings. This means your users don't lose productivity working across multiple interfaces and you save on the added complexity and maintenance of a multi-vendor solution.

Make work easier with integrated apps, bots, and automated workflows.

Microsoft Teams helps minimize disruptions, save time, and make work easier by enabling users to bring the apps they use most—across chats, channels, and meetings—directly into Teams. These rich platform capabilities mean users have more ways to work together, not just meetings. Low- or No-code tools from Microsoft that integrate easily into Teams empower users to digitize everyday tasks and automate complex processes, so they can focus on valuable work—no matter if it is before, during, or after a meeting.

Protect users and data so you can work with confidence.

In Microsoft Teams, protecting your users and data is a key priority, built into the product. Critical native security features, that some other solutions lack, help prevent data loss, stop users from opening malicious files or links, or regulate access based on risk level, helping to keep your users and IP safe. But don't just take our word for it—we back our promise with strong contractual commitments for your peace of mind.

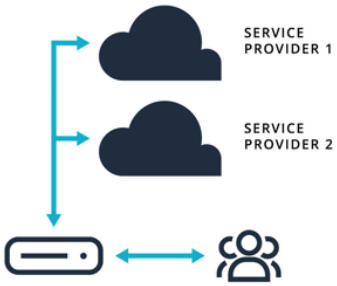

Westelcom®

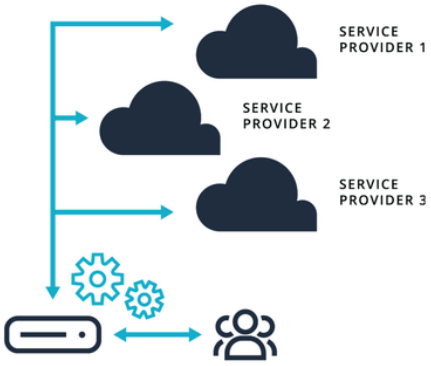

SD-WAN

Westelcom has the ability to purchase, install, and combine networks from multiple carriers to provide one geo-diverse and redundant network between multiple branch locations. Our carrier engineering group will assist your business with designing, engineering and installing a carrier grade SD-WAN solution.

Enhance levels of resiliency, efficiency, reporting, security and application visibility that Mission-Critical businesses require.

	Traditional	Backup	SD-WAN
Connectivity	1 Active MPLS or Broadband	1 Active MPLS, 1 Backup Broadband	Combo of MPLS, broadband, and LTE that is load balanced &bonded
Security	Dedicated lines; internet traffic is backhauled to Service Provider	Dedicated lines; internet traffic is backhauled to Service Provider	Very high. Embedded security with firewalls, AutoVPN, and segmentation
Cloud Access	Backhaul to data center and then to cloud	Backhaul to data center and then to cloud	Direct access to cloud option using cloud gateway. Offloads cloud applications from core network
Configuration	Manual configuration	Manual configuration	"Zero Touch Provisioning" allows no need to perform manual configuration
Quality	Dedicated connections maintain high QoS	Dedicated connections maintain high QoS	Business policies define acceptable levels of performance and route traffic accordingly
MGMT	Decentralized control of devices	Decentralized control of devices	Centralized control of devices
App Visibility	Low visibility of performance	Low visibility of performance	Deep application visibility
Disaster Recovery	Manual recovery	Manual recovery	Real-time connectivity to DR sites

Westelcom®

Colocation & Data Center

With multiple accessible, state-of-the-art facilities with backup power, redundant internet connectivity, and perimeter security, our colocation and data center services allow you to increase connectivity, avoid downtime and loss of critical data, and take advantage of public peering and carrier connections.

Westelcom owns and operates five data centers near major metropolitan areas and Carrier Colocation Centers with meet-points in NYC, Boston, Syracuse, Albany, and Montreal, all directly connected to Google, Amazon+, and Microsoft Cloud platforms.

- Outage protection
- Business continuity
- IT cost reduction strategy
- Massive bandwidth availability
- Flexible power arrangements
- Budget-sensitive pricing

- Video and fire monitored
- Steady connectivity with redundant generator backing
- Environmentally controlled with consistent humidity and temperature control

- Fully diverse fiber-optic based facility
- Cloud and hosted offerings
- Direct access to multiple Email, Web and Fiber Optic Internet providers

Westelcom®

Contact Center as a Service (CCaaS)

Our Contact Center as a Service (CCaaS) solution is a flexible, cost-efficient, cloud-native alternative to on-premises contact centers that gives companies the freedom to break free from complex, expensive on-premises solutions and concentrate on what is important to the business: their customers.

In partnership with TalkDesk, Westelcom's CCaaS solution joins all the parts of an on-premises contact center, such as the interactive voice response (IVR), computer telephony integration (CTI), communication channels, contact center analytics, and more into a single solution delivered on the cloud. CCaaS allows companies to move away from siloed software and support a customer-centric approach with an omnichannel contact center platform.

A traditional on-premises contact center has to accommodate everything—workforce, software, hardware, and more—in a physical location. CCaaS hosts everything in the cloud.

	On-Premises Contact Center		Westelcom CCaaS
COST	Upfront costs include: Hardware, software, servers, licenses, maintenance.	vs.	No upfront costs. Pay as you go, scalable pricing models.
HARDWARE	Computers, headsets, servers, switchboards, cables, and more.	vs.	Minimal hardware: Internet connection, computers, headsets.
INSTALLATION	Takes several months—or even years.	vs.	1-5 weeks—in some cases, days.
MAINTENANCE	Requires a dedicated IT team.	vs.	Westelcom provides 24x7x365 monitoring through its Network Operations Center.
RELIABILITY	Dependent on the dedicated IT team.	vs.	Built on Westelcom's carrier-grade fiber network with diverse connectivity and redundancy.
SCALABILITY	Additional costs for upgrades and new features.	vs.	No extra costs for upgrades and new features.

Westelcom's CCaaS provides companies with an adaptable, cost-effective solution that brings extensive value to both employees and customers.

- ✔ Improves the **agent experience** by unifying all the tools and applications agents need on a single screen.
- ✔ Improves the **customer experience** by freeing companies to meet the demands of tech-savvy consumers through an adaptable customer service application with multichannel integration and omnichannel service.

Westelcom®

Web Hosting

PRICING TIERS Add 10 additional mailboxes to any package for $9.99 | Domain registration fee $14.95/yr.

1GB	10GB	50GB	100GB	Mail Only
5 Mailboxes	5 Mailboxes	10 Mailboxes	20 Mailboxes	10 Mailboxes
$9.95	$12.95	$24.95	$35.95	$9.99

Our hosting solutions are ideal for businesses with existing CLEC / ISP services and customers who have their own IT person or group to manage their hosting migrations and maintenance through Westelcom-provided portals. For customers who need help with their websites, Westelcom refers to third-party MSPs.

Web Hosting Includes:

- Unlimited Domain names and DNS hosting
- Built-In Malware / Virus protection
- SSL Certificate included
- Unlimited SQL databases
- HTML5 & Javascript & PHP supported
- DNS Self-management
- cPanel Control Panel (full self-management of space and services)

Mailbox Hosting Includes:

- Admin portal to add/remove users/mailboxes
- Each mailbox is 25G max capacity
- Built-in SPAM/Malware/Virus protection
- 2 factor authentication (optional)
- SSL / Secure mail transport
- Webmail
- Supports IMAP / POP3 / SMTP

Why not GoDaddy?

Customers who choose Westelcom over a third-party hosting service provider have the benefit of seeing all their solutions on one bill and dealing with the same trusted team that supports their CLEC / Internet services.

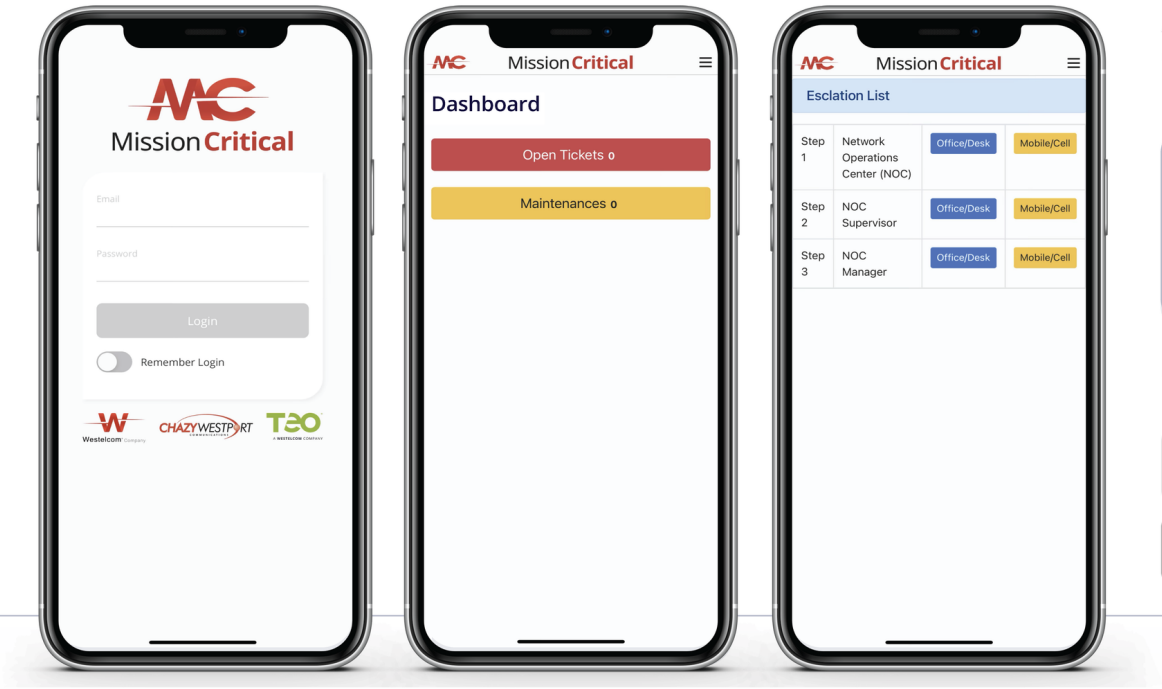

Why not Microsoft 365 instead of mail hosting?

Westelcom does sell 365 as well, but plenty of businesses are simple in email communication (They a few mailboxes to handle communication with their customers) and do not need to pay extra for the collaboration features in 365

Westelcom®

Mission-Critical Support

Westelcom's premier mission critical notification app, originally developed for the hospitals and medical facilities, is now available for use in your organization by request.

Access Mission Critical on the desktop at mc.westelcom.com

or download the Mission Critical app:

Available on the App Store

GET IT ON Google Play

Accessible via desktop or mobile app, Mission Critical lets you:

- Create support requests
- Receive mission critical notifications
- Monitor ticket activity
- Manage push notifications
- Monitor network up-time
- Review network maintenance updates
- Request service changes
- View Statistics and reports (usage utilization, traffic analysis)
- And more—we are continually enhancing and adding features!

To receive login credentials, contact the Network Operations Center at 1.866.482.5425 or sales@westelcom.com.

Westelcom Referral Program

Earn rewards by referring businesses to Westelcom...

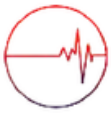

For each successful referral, you can earn a bonus of $100 for any sale generating $100-$500 in monthly recurring revenue and $500 for any sale generating more than $500 in monthly recurring revenue. To get started, simply submit the referral form at https://westelcom.com/refer/.

...for any Westelcom solution.

Internet Connectivity

Business-class internet solutions built on a carrier-grade fiber network with diverse connectivity and redundancy.

Business Voice & Phone

High-quality business PBX and VoIP voice services bring efficient communication to the entire team.
